

ACADEMIC PROGRAMME & TUITION FEES

MINIBOSS BUSINESS SCHOOL
NEW INTAKE 2023

GLOBAL BUSINESS EDUCATION
FOR KIDS & TEENS

Age Groups: 6-8, 9-11, 12-14, 14-17

In-Person & Online

The banner features two children, a boy and a girl, holding books. On the left is the 'MiniBoss BUSINESS SCHOOL' logo. In the center, it says 'NEW INTAKE IN-PERSON & ONLINE' and 'WORLD'S #1 MINIBOSS BUSINESS SCHOOL'. Below this is an 'International Diploma' icon. On the right, a vertical list of features includes: GLOBAL PROGRAM, WEEKEND CLASSES, COURSE BOOKS, GAME METHOD, BUSINESS INCUBATOR, STARTUP FORUMS, and WORLD CHAMPIONSHIPS. At the bottom left, it says '8 COURSES +12 TYPES OF PRACTICE' with icons for each. At the bottom right, it says 'Harvard for kids!'.

1

The purpose of education

Before 18th century, children did not go to schools at all. The first mass public schools were invented 150-170 years ago only with purpose to train future workers for factories and plants.

In the 20th century, children went to school for the sake of a certificate, which gave them a right to work and a right apply to university.

In the 21st century, children and parents want the main thing from schools to unleash the personal full potential of each child and develop their abilities to achieve dreams.

However, any private or public regular schools in the world do not care about real life skills. Regular School purpose is to provide a teaching of theory of subjects. Therefore, we filled in the missing part in modern education – MiniBoss World-Class Business Education as additional weekend classes for young leaders of the Globe.

MINIBOSS BUSINESS SCHOOL focuses on the **unleashing students' FULL POTENTIAL** and skills how to **MONETIZE** the knowledge gained, taking into account the talents of everyone.

MINIBOSS BUSINESS SCHOOL is the **world's one & only education network** for entrepreneurial education for kids and teens with unique Programmes and 12 types of practice!

6-17 is a key age for MINIBOSS

It has been scientifically proven that at an early age from 6 to 17 years old people have the highest neuroplasticity - our brain is able to absorb EVERYTHING (both good and bad patterns of behaviour), forming a strong or weak character. Therefore, it is important what we learn in childhood.

Starting to form character from 6, 9, and 12 years old, we still have time to influence the formation of personality!

It is too late to start developing your skills at the university age.

Why is not enough to be just SMART?

Having the best grades in school does not guarantee that you will be successful in life.

Just the opposite, we often see inversely proportional statistics between grades and success in life. Why? No matter how much knowledge you have, what matters is your ability to turn any knowledge into practice (into a successful project!). This is the most important KPI of modern education!

These are completely different competencies: just memorizing knowledge or applying them, being a lone know-it-all or being a team leader who takes responsibility!

Therefore, in the 21st century it is extremely important to be not just smart, but also **SUCCESSFUL** who have proven the value of their mind in practice. Moreover, this means being able to survive in different situations, to take care of a family, to be not just a professional, but earn a lot, take risks consciously and not be afraid to invent and implement new ideas into real life, negotiate and sell....

All of this requires eight basic intelligences (MINIBOSS 8Qs Innovative Method)! We develop not just IQ only like in public schools, we develop strong and creative personality for a successful future - 7 more Qs. Do you want to know about it?

What and how do children study at MINIBOSS?

In MINIBOSS, children study eight courses gradually developing their eight basic intelligences through the unique 8Qs Method.

Students study 18 subjects (from psychology to talent management studies, from rhetoric to marketing, from invention to entrepreneurship) CONSCIOUSLY shaping their character, skills and future.

What will students learn in MINIBOSS?

From an early age, a MINIBOSS student will learn eight essential things:

- ✚ **PRACTICE** - how to turn any knowledge into a real project!
- ✚ **PROBLEM SOLVING** - the main skill that distinguishes successful from unsuccessful,
- ✚ **MOTIVATION** - the ability to turn your laziness into a desire to achieve your DREAMS!
- ✚ **INVENTION** - the development of creative qualities for the creation of NEW IDEAS!
- ✚ **HEALTHY ENVIRONMENT** – the ability to find friends with motivation and family values,
- ✚ **TEAM WORK** - the ability to negotiate and build a mechanism that achieves goals!
- ✚ **LEADERSHIP** - the ability to lead and be a role model!
- ✚ **GLOBAL** - the ability to present results of academic year on the global stage as a participation in STARTUP WORLD CUP CHAMPIONSHIPS, turning your fears into a skill to win! Develop contacts with world leaders!

MINIBOSS Scientific Integrity

Yes, even the first course will give to a child significant benefits and visible changes! At the same time, it is important to complete the full programmes (8 courses and 12 types of practice). Every year a certain type of intelligence develops according to the 8Qs Method - therefore only a holistic approach gives full unleashing of potential and guarantees of 100% success of training. The skills developed in MINIBOSS bring HAPPINESS AND SUCCESS to children in life!

Proven by the experience of more than 9,000 of our graduates!

Upon completion of the full programme, students receive a **MBBS/ UK INTERNATIONAL DIPLOMA!**
